

## Philippines: A Medical Tourism Hub of South East Asia

by: Manisha Roy

One of the most beautiful and picturesque of South East Asian nations, Philippines is fast becoming one of the most popular travel and medical hub in the region. Offering travelers with great sightseeing options long with excellent medical facilities at affordable rates, Philippines welcomes thousands of visitors per year from around the globe. Easy availability of cheap flights for Philippines has done well to serve the cause. The exquisite beaches and serene ambience of the coastal areas make for ideal retreats to recuperate and relax before and after operation. The country has gained immense popularity amongst the European and American medical travelers transforming Philippines into a perfect destination for medical treatments and surgeries of all kinds.

Since a long time, the most modern and sophisticated of hospitals were only concentrated in the capital city of Manila. But today, several state-of-the-art hospitals have been built in other cities as well like Davao and Luzon. Some of the most popular surgeries undertaken at these hospitals include organ transplants, knee and hip replacements, dental care and eye operations. Apart from the fact that medical facilities in the country are world class, cost effectiveness of these treatments acts as a major incentive for the patients who throng Philippines in large numbers. One can easily book cheap flights to Philippines online and avail medical care and treatments at a fraction of a cost! For example, full set of dental implants can cost as less as US \$500 in the country. The staff and the doctors are all fully trained and possess great English speaking skills. What's more, the hospital rooms are at par with five star hotel rooms and offer patients as stress-free and comfortable experience.

This instant success of Philippines as a great health care center can be owed to the incessant efforts of the government and their particular initiatives in the health care sector of the country. No wonder, cheap flights to the country are in great demand amongst patients who owing to exorbitantly high prices cannot afford similar treatments in their home country. Medical tour packages that take care of your visas, accommodation, hospital costs and transportation are the best options for patients. Apart from health care, cosmetic surgeries such as liposuction, rhinoplasty, abdominal tucks and breast augmentation are also in great demand in Philippines. Moreover, patients also love the country for its health spas and relaxation centers that offer them complete healing of the mind, body and soul. Book your cheap flight to Philippines today for a long and healthy life!
